

# PAULIS sleep checklist

*This is supplementary material for my sleep video. For motivations and full explanations, watch it: <https://youtu.be/T2PzrBl9JLO>*

## when it is 3AM

### PREP for sleep:

- ☐ open windows
- ☐ low, dim lights
- 
- ☐ no eating
- ☐ no screens
- 
- ☐ open up a book you want to read

### going to BED:

- ☐ close windows slightly
- ☐ cover your eyes (for max dark)
- ☐ focus on your breath (5,6,7 or box breathe)

If it feels like 30 min passed and still no sleep:

*get up, chill out for a while, try again*

## one day of setting up your sleep

### WALK and GET:

- ☐ **pick up a book you'll read** (important as otherwise no hope of not using screens)
- ☐ **get sleeping mask, micropore tape, ear plugs** (important as these are the quickest way to rid of light, noises, and bad breathing; crazy improved sleep quality)
- ☐ **buy some electrolytes** (powder form or sports drink – check to contain salt, Mg, Ca, K)
  - can get some candles (for lighting and nice aroma)
  - source some complex carbs for dinner
  - essential oils for your pillow for sleep
  - darker curtains / blinds

*Have this walk be your unstructured mental activity of the day; walk with no phone or music!*

## set up your home

- ☐ **toss ALL lights from your bedroom** (install those new curtains?)
- ☐ **feng shui your bed** (move items around so your bed feels safe, in a controlling position)
  - throw out your melatonin

# habits

Organised as the **PERFECT DAY**:

- ☐ **wake always at the same time**
  - ☐ drink electrolytes
  - ☐ **ASAP direct sunlight in your eyes**
    -
  - ☐ take a nap
    -
  - ☐ friends and water to not fall asleep
  - ☐ **30 minutes unstructured mental activity** (walk, meditate, ...)
    -
  - ☐ dinner 2 hours before bed (some nice pasta to have a crash at bedtime)
  - ☐ **low, dim lights after sunset**
  - ☐ warm shower, stretch, massage
  - ☐ **go to sleep mute, deaf, blind** (eye mask, mouth tape, ear plugs)
- 

## closing words

Let this system be your lifeline while you continue figuring things out! Reducing stress (or your response to stressful stimuli) and building a life you enjoy living (or learning to enjoy whatever life occurs; I am rereading the stoic Marcus Aurelius... I think it's showing).

Have fun, you've got this!

Be a Good Gardener,

**PAULIS**
